

## Faculty of Oral & Dental Medicine

### Oral Histology

**Information :**

**Course Code :** HPT 221

**Level :** Undergraduate

**Course Hours :** 3.00- Hours

**Department :** Faculty of Oral & Dental Medicine

**Instructor Information :**

Title	Name	Office hours
Professor	AMANY AHMED RABEE MOHAMED OSMAN	6
Professor	Mona Fathy Abdel Maksoud Eldeeb	13
Associate Professor	RANEEM FAROUK MOHAMED ADEEB OBEID	5
Associate Professor	RANEEM FAROUK MOHAMED ADEEB OBEID	5
Lecturer	Nehad Mostafa Abd El Monsif Mostafa	5
Lecturer	Nehad Mostafa Abd El Monsif Mostafa	5
Assistant Lecturer	Aya Mohamed Reyad Ismaeil AbuHussein	2
Assistant Lecturer	Esraa Gamal Hassan Mohamed	2
Assistant Lecturer	Esraa Gamal Hassan Mohamed	2
Teaching Assistant	Esraa El Sayed Abdelaziz Abdelrahman	
Teaching Assistant	Amira Ahmed Elsayy Elgendy	

**Area Of Study :**

- To keep pace with recent advances in oral biology.
- To provide an expanded knowledge about histology, embryology and physiology of oral and dental tissues.
- To serve as a basis for understanding the clinical courses such as oral pathology, oral surgery and oral medicine etc.
- To enable the development and application of appropriate professional attitude as well as communication and practical skills of the students.

**Description :**

tooth development ( bud stage, cap stage, bell stage, appositional stage. )  
 Enamel, dentin, cementum and pulp  
 longitudinal and transverse section of enamel, dentin, cementum. )  
 decalcified section of the pulp

**Course outcomes :**

**a.Knowledge and Understanding: :**

1 -	Define the different oral and para oral structures..
2 -	Describe embryology of oral and para oral tissues.
3 -	Identify and draw both hard and soft oral tissues..

4 -	Describe the structure and the function of different oral and para oral tissues.
5 -	Differentiate between different hard dental and soft oral tissues
6 -	Explain the clinical significance associated with certain oral and para oral structures.
7 -	Describe the histological age changes of oral and para oral tissues..
<b>b.Intellectual Skills: :</b>	
1 -	Differentiate between the different oral and para oral tissues..
2 -	Distinguish any abnormalities that might affect the normal oral and para oral tissues.
<b>c.Professional and Practical Skills: :</b>	
1 -	Use the light microscope properly.
2 -	Identify the different oral tissues using the light microscope.
3 -	Draw the histological structure of oral and para oral tissues.
4 -	Understand the technical steps for preparation of tooth ground and decalcified microscopic sections as well as the main histological and histochemical stains..
<b>d.General and Transferable Skills: :</b>	
1 -	Communicate effectively with colleagues , staff members and helping personnel.
2 -	Demonstrate appropriate professional attitude
3 -	Behavior in different situations

#### **Course Topic And Contents :**

Topic	No. of hours	Lecture	Tutorial / Practical
Tooth development	15		
Enamel	12		
Dentin	11		
Cementum	8		
Pulp	8		
Shedding	4		
Eruption	6		

#### **Teaching And Learning Methodologies :**

Lectures.
Practical
Small group sessions
Student draw in their practical books under supervision of the responsible staff members and helping personnel in small subgroups

#### **Course Assessment :**

Methods of assessment	Relative weight %	Week No	Assess What
1st Mid-term Examination	15.00		assess knowledge and understanding
2nd Mid-term Examination	15.00		assess knowledge and understanding
Final written Examination	25.00		

Oral Examination	10.00		knowledge and understanding and attitude
Practical Examination	15.00		assess practical skills & intellectual skills & general skills
Semester Work	20.00		

**Course Notes :**

- All lectures are available for students from the faculty as a soft copy.
- Textbooks : Mary Bath-Balogh, Margaret J. Fehrenbach, Dental Embryology Histology and anatomy 2th Edition ,2006
- Websites related to the studysubject
- Overhead projectors, slides and computer presentations used during teaching
