

Faculty of Pharmacy
Pathology & Pathophysiology

Information :

Course Code : PHP 221

Level : Undergraduate

Course Hours : 4.00- Hours

Department : Faculty of Pharmacy

Instructor Information :

Title	Name	Office hours
Associate Professor	Hayam Ateya Abdelkawy Moussa	9
Lecturer	Marwa Nagi Mehesen Omran Farag	14
Assistant Lecturer	Suzan Magdy Ismaeil Ahmed	
Teaching Assistant	Aalaa Mahmoud Ahmed Shawqi Mahmoud	

Description :

The course promotes the understanding and application of fundamental disease process in clinical settings. General concepts of disease, including etiology, pathogenesis, and clinical significance and to relate them to pathologic changes in cells, tissues, organs and body systems. The course teaches students the pathogenesis of various symptoms & diseases affecting the human body accordingly altered physiological functions of human organs are explained to enable students to understand the relation between symptoms & the disease, which might be helpful in diagnosis. These concepts are applied in a systems oriented approach to disease process affecting e.g. musculoskeletal, cardiopulmonary, renal, nervous, gastrointestinal, immune, hematological and endocrine systems
