

Faculty of Engineering & Technology

Physics 3

Information :

Course Code : PHY 231

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Department of Petroleum Engineering

Instructor Information :

Title	Name	Office hours
Lecturer	AHMED MOHAMED ALI ASHOUR AHMED	10
Assistant Lecturer	Mohamed Essam Abd El Aziz Abd El Aal	4
Teaching Assistant	Akram Rabie Hamed Ragheb Tobar	

Area Of Study :

The objective of this third physics course for the engineering students is to develop their ability to understand Optics and Modern physics topics in comparative view between classical and quantum physics and to analyze and logically solve problems of engineering applications based on these topics. On successful completion of these courses the engineering student will be able to:

1. Know and understand all old classical physics that is applied up to today.
2. Learn Optics as a single topic.
3. Learn Modern physics as a single topic.
4. Solve problems about these two topics.
5. Understand the comparative view between classical and quantum physics.

Description :

Special theory of relativity, Quantization and Max Planck principle, Black body radiation, The photoelectric effect, Wave particle duality and De Broglie Hypothesis, matter waves, Electron microscopes, Uncertainty principle and Heissenburg principle, Wave function for a confined particle, Schrodinger wave differential equation in one dimension, Particle in an infinite potential well, X-rays spectroscopy, Nuclear physics and radiation safety.

Course outcomes :

a. Knowledge and Understanding: :

1 -	The differences between classical and modern physics. a2. The types of waves.
2 -	The types of waves.
3 -	The mechanical waves.
4 -	The sound waves.
5 -	The electromagnetic waves and physical optics.
6 -	The old modern quantum theory.
7 -	The wave mechanics and its modern applications.

b. Intellectual Skills: :

1 -	Deal with physical problems.
2 -	Think logically and creatively.

c. Professional and Practical Skills: :

1 -	Gaining skills in identifying and using the different physical parameters related to this course, and perform experiments related to these topics.
2 -	Gaining skills in constructing the physical laws and be able to solve the physical problems.

d. General and Transferable Skills: :

1 -	Work effectively in team.
2 -	Develop skills related to creations thinking, problem solving , oral and written presentation, and team work.

Course Topic And Contents :

Topic	No. of hours	Lecture	Tutorial / Practical
Mechanical Waves	10	6	2
Sound Waves	10	6	2
Waves Interference	7	3	2
Diffraction of waves	7	3	2
Max-Planck Assumptions	6	2	2
Einstein Photoelectron Theory	6	2	2
Bohr Theory for Hydrogen-Like Atom	6	2	2
De Broglie , and Heisenberg Assumptions	7	3	2
The infinite Potential Well	10	6	2
The Tunneling Effect	6	2	2
Applications on Quantum Mechanics	12	4	4
Revision	6	2	2

Teaching And Learning Methodologies :

Teaching and learning methods
Lectures
Practical sections
Assignments and homework
Working models

Course Assessment :

Methods of assessment	Relative weight %	Week No	Assess What
Final Exam	40.00		
Lab	20.00		
Mid-Term Exam 1	15.00		

Mid-Term Exam 2	15.00		
Semester Work	10.00		
Total	100.00		

Course Notes :

handout and notes

Recommended books :

- 1 College physics- Giambattista and Richardson, Mac gramtill, 3rd edition, 2010.
- 2 Physics for scientists and engineers- Serway, Thomson Brookes/Cok., 8th edition, 2011.
