

Basic Information :

Name : Dina
Title : Lecturer

Dina Muhammad Fathi Ors

Born October 1, 1987) is an Egyptian Structural Engineer known as lecturer Assistant Structural Engineering and Construction Management Department, Faculty of Engineering and Technology, Future University in Egypt(FUE).

After obtaining a bachelor's degree in civil engineering from the University of Ain Shams with grade very good with degree of honor and Excellent degree in Reinforced Concrete structures Design PROJECT, Dina studied successfully premaster courses include analysis of reinforced concrete high rise buildings, properties and strengthening of materials, Fiber-reinforced plastic (FRP) properties, Quality control of manufacturing reinforced concrete, soil dynamics, statistics, resource management and productivity. Later she finished Master thesis in Reinforced Concrete Design titled Non-linear finite element modeling of shear critical reinforced concrete elements.

In December 2014; Dina has successfully passed the qualification exam required for starting PHD studies at AIN SHAMES University. Dina completed six pre-PHD courses within one semester (Fall 2016).

October 2015; Dina started her PhD thesis by submission the research plan and starting the experimental work of the research at reinforced concrete laboratory of Housing and Building National Research Center (HBRC).

Education :

Certificate	Major	University	Year
PhD	Structure engineering	Ain Shams University - Faculty Of Engineering	2019
Masters	Faculty of Engineering - Structural Engineering Department - Design of Reinforced Concrete Structures	Ain Shams University- Faculty Of Engineering	2014
Bachelor	Civil Engineering	Ain Shams - Egypt	2009

Teaching Experience :

Name Of Organization	Position	From Date	To Date
Future University in Egypt (FUE)	Teaching Assistant	01/01/2009	01/01/2014

Research :

Cyclic Load Behavior of Self-Centering Hammer-Head Bridge Piers

A MIXED SMEARED/DISCRETE CRACKING MODELING APPROACH FOR SHEAR CRITICAL REINFORCED CONCRETE BEAMS

Non-linear finite element modeling of shear critical reinforced concrete elements

Conference :

Analytical Study in the Cyclic Response of Self-Centering Bridge Piers
