

Basic Information :

Name : Mohamed Galal Khalil Ibrahim El Sherbiny

Title : Lecturer

Dr. Mohammed Galal is a Structural Engineering Lecturer at the Future University of Egypt - Faculty of Engineering and Technology – Structural Engineering and Construction Management department.

He received his M.Sc. and PhD. in the structural engineering from Ain Shams University.

He believes his chosen career as a university professor has provided him with a unique opportunity to contribute to the shaping of society and the future. His perspective on teaching has been strongly influenced by his experiences as a manager of an engineering consultant office.

He believes his primary responsibility is to provide students with the skills, knowledge, values and experience necessary so that they can expand their personal horizons and have the ability to be successful in their chosen careers and lives.
