

## Faculty of Oral & Dental Medicine

### Applied Dental Biomaterials

#### Information :

**Course Code :** DBM 213

**Level :** Undergraduate

**Course Hours :** 3.00- Hours

**Department :** Faculty of Oral & Dental Medicine

#### Instructor Information :

Title	Name	Office hours
Lecturer	MOHAMED MAHMOUD ABDELFATAH AMMAR	1
Assistant Lecturer	WALAA MOSTAFA NEMR BAYAA	
Teaching Assistant	Ahmed Mohamed Abdelaleem Mohamed elsaid Shhatah	

#### Area Of Study :

- ~To present the applied aspects of dental materials as they are related to clinical manipulation by the dentist.
- ~To bridge the gap between the knowledge obtained in the basic course in materials science, chemistry, and physics and the dental operator.
- ~To analyze the benefits and limitations of dental materials.
- ~To make rational decisions on the selection of dental materials and use in a clinical practice.

#### Description :

- ~To present the applied aspects of dental materials as they are related to clinical manipulation by the dentist. ~To bridge the gap between the knowledge obtained in the basic course in materials science, chemistry, and physics and the dental operator. ~To analyze the benefits and limitations of dental materials. ~To make rational decisions on the selection of dental materials and use in a clinical practice.

#### Course outcomes :

##### **a. Knowledge and Understanding: :**

1 -	Describe / discuss strengthening or improving or modifying procedures of applied dental materials and properties of newly introduced/modified materials.
2 -	List technical considerations, possible errors and defects.
3 -	Understand the properties, chemistry of setting reactions, compositions and microstructures.
4 -	Recognize the different applied dental materials preparation or processing procedures.
5 -	Identify the different applied dental materials types and classifications.
6 -	Recognize the ideal requirements of the different dental materials according to their clinical applications.

##### **b. Intellectual Skills: :**

1 -	Criticize prepared / processed applied dental materials.
2 -	Compare between the applied dental materials according to their properties and use
3 -	Relate composition and microstructure of the different applied dental materials to their properties and behaviors.

**c. Professional and Practical Skills: :**

1 -	Asses prepared / processed dental materials for possible defects.
2 -	Illustrate probably the manipulation steps of the different applied dental materials.
3 -	Recognize the appropriate material suitable for each clinical situation.
4 -	Identify the different dental materials and their mode of supply.

**d. General and Transferable Skills: :**

1 -	Demonstrate appropriate professional attitude and behavior in different situations.
2 -	Communicate effectively with colleagues, staff members for information gathering.

**Course Topic And Contents :**

Topic	No. of hours	Lecture	Tutorial / Practical
1. Dental Cements.			
2. Direct Esthetic Restorative Materials.			
3. Dental Amalgam.			
4. Dental Ceramics			
5. Wrought wires.			
6. Joining of metals.			

**Teaching And Learning Methodologies :**

Lectures
Small group sessions.
Demonstration
E-Learning
Self-learning
Problem based learning (PBL)

**Course Notes :**

yes

**Recommended books :**

Restorative Dental materials edited by RG Craig.  
Phillips' Science of Dental materials.
