

Faculty of Oral & Dental Medicine

Applied Dental Biomaterials

Information :

Course Code : DBM 213

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Faculty of Oral & Dental Medicine

Instructor Information :

Title	Name	Office hours
Lecturer	Khadiga Mostafa Kamel Saad Sadek	1
Teaching Assistant	Ahmed Mohamed Abdelaleem Mohamed elsaid Shhatah	

Area Of Study :

ÅTo present the applied aspects of dental materials as they are related to clinical manipulation by the dentist.
 ÅTo bridge the gap between the knowledge obtained in the basic course in materials science, chemistry, and physics and the dental operator.
 ÅTo analyze the benefits and limitations of dental materials.
 ÅTo make rational decisions on the selection of dental materials and use in a clinical practice.

Description :

ÅTo present the applied aspects of dental materials as they are related to clinical manipulation by the dentist. ÅTo bridge the gap between the knowledge obtained in the basic course in materials science, chemistry, and physics and the dental operator. ÅTo analyze the benefits and limitations of dental materials. ÅTo make rational decisions on the selection of dental materials and use in a clinical practice.

Course outcomes :

a.Knowledge and Understanding: :

1 -	Describe / discuss strengthening or improving or modifying procedures of applied dental materials and properties of newly introduced/modified materials.
2 -	List technical considerations, possible errors and defects.
3 -	Understand the properties, chemistry of setting reactions, compositions and microstructures.
4 -	Recognize the different applied dental materials preparation or processing procedures.
5 -	Identify the different applied dental materials types and classifications.
6 -	Recognize the ideal requirements of the different dental materials according to their clinical applications.

b.Intellectual Skills: :

1 -	Criticize prepared / processed applied dental materials.
2 -	Compare between the applied dental materials according to their properties and use
3 -	Relate composition and microstructure of the different applied dental materials to their properties and behaviors.

c.Professional and Practical Skills: :

1 -	Asses prepared / processed dental materials for possible defects.
-----	---

2 -	Illustrate probably the manipulation steps of the different applied dental materials.
3 -	Recognize the appropriate material suitable for each clinical situation.
4 -	Identify the different dental materials and their mode of supply.

d.General and Transferable Skills: :

1 -	Demonstrate appropriate professional attitude and behavior in different situations.
2 -	Communicate effectively with colleagues, staff members for information gathering.

Course Topic And Contents :

Topic	No. of hours	Lecture	Tutorial / Practical
1. Dental Cements.			
2. Direct Esthetic Restorative Materials.			
3. Dental Amalgam.			
4. Dental Ceramics			
5. Wrought wires.			
6. Joining of metals.			

Teaching And Learning Methodologies :

Lectures
Small group sessions.
Demonstration
E-Learning
Self-learning
Problem based learning (PBL)

Course Notes :

yes

Recommended books :

ÅRestorative Dental materials edited by RG Craig. ÅPhillips' Science of Dental materials.
