

Faculty of Engineering & Technology

Probability and Statistics (Math 6)

Information :

| Course Code : | MTH 312 | Level | : | Undergraduate | Course Hours : | 3.00- Hours |
|---------------|---------|-------|---|---------------|----------------|-------------|
| | | | | | | |

Department : Department of Mechanical Engineering

Instructor Information :

| Title | Name | Office hours |
|---------------------|--|--------------|
| Associate Professor | Nashwa Mohamed El Sayed Mohamed | 8 |
| Assistant Lecturer | Doaa Nabil Sayed Mohamed Elsayed Khodair | |

Area Of Study :

This course aims to develop the students for concepts of statistical studies and to perform descriptive and basic inferential statistical studies. The course gives the students the ability to understand the inference techniques for the inferential statistical studies within the areas of interest.

Description :

Descriptive statistics and data analysis, Introduction to probability theory, conditional probability, Bayes theorem, Random variables and probability distribution, Discrete and continuous random variables, Mathematical expectation of random variables and some special expectation, Some discrete probability distribution (Binomial and poisson). Some continuous distribution (Normal distribution, t- distribution), Introduction to estimation and tests of hypothesis. Correlation analysis, applied statistics.

Course outcomes :

| a.Knowledg | ge and Understanding: : | |
|--------------|--|--|
| 1 - | Recognize the fundamental features of the probability theory, and other statistical topics. | |
| 2 - | Distinguish the meaning of conditional probability and its application | |
| 3 - | Describe random variables, discrete and continuous distributions. | |
| 4 - | Define samples and population measures (point and interval estimate). | |
| b.Intellectu | al Skills: : | |
| 1 - | Summarize Statistical concepts essential and necessary for applications in Mechanical engineering problems | |
| 2 - | Think logically and creatively. | |
| 3 - | Analyze the appropriate method for the solutions of statistical engineering problems using convenient methods. | |

Course Topic And Contents :

| Торіс | No. of hours | Lecture | Tutorial / Practical |
|---|--------------|---------|----------------------|
| Descriptive statistics and data analysis. Definitions and concepts. | 10 | 6 | 4 |
| Random variables and probability distribution: Discrete and continuous random variables | 10 | 6 | 4 |
| Random Variables and Probability Distribution | 10 | 6 | 4 |
| Mathematical expectation of random variables and some special expectation | 10 | 6 | 4 |
| Some discrete probability distribution (Binomial and Poisson). | 10 | 6 | 4 |
| Some continuous distribution (Normal distribution). | 10 | 6 | 4 |
| Introduction to the estimation and tests of hypothesis. | 10 | 6 | 4 |
| Correlation analysis. | 5 | 3 | 2 |

Teaching And Learning Methodologies :

Interactive Lecturing

Problem solving

Discussion

Course Assessment :

| Methods of assessment | Relative weight % | Week No | Assess What |
|-----------------------|-------------------|---------|---|
| Participation | 10.00 | | To assess understanding and problem solving skills |
| Assignments | 5.00 | | To assess lecture material comprehension |
| Final exam | 40.00 | 16 | |
| First Exam | 20.00 | 5 | To assess understanding and problem solving skills |
| Quizzes | 5.00 | | To assess material comprehension & self study. |
| Second Exam | 20.00 | 10 | To assess understanding and problem solving skills |
