Faculty of Engineering & Technology

Execution Designs 2

Information :

Course Code :	ARC474	**Level**	: Undergraduate	**Course Hours :**	3.00- Hours

Department :	Architectural Engineering

Instructor Information :

Title	Name	Office hours
Professor	Gamal Mohamed Attia Elkholy	

Description :

The course focuses on detailing the execution and construction issues. Sketches and diagrams are needed to clarify all main stages of design and execution details. Students are required to research and investigate the different roles of material in design. In addition, students will learn how to write technical specifications of building/construction items. Their practice will be on a medium-scale project.
