

Faculty of Computers and Information Technology

Natural Language Processing

Information:

Course Code: CS443 Level: Undergraduate Course Hours: 3.00- Hours

Department : Department of Computer Science

| Instructor Information : | | | | |
|--------------------------|---|--------------|--|--|
| Title | Name | Office hours | | |
| Associate Professor | Wael Hassan gomaa Mohamed Abuzaid | | | |
| Teaching Assistant | Ahmed Mohamed Nasr Abdel Latif El Dafrawy | | | |
| Teaching Assistant | Farah Ashraf Wafaa Mahmoud | | | |

Area Of Study:

Understand knowledge that enhances skills in fundamental area of computational properties of natural languages. Use and adopt fundamental and advanced computational linguistics.

Evaluate effectively the merits of design the NLP system.

Use all available principles and tools of natural language processing.

Comprehend deeply the basic concepts of the computing linguistics.

Develop and evaluate the architecture of NLP system process and components.

Description:

Fundamental concepts and ideas in natural language processing (NLP), also known as computational linguistics. It develops an in-depth understanding of both the algorithms available for the processing of linguistic information and the underlying computational properties of natural languages. Word level, syntactic, and semantic processing from both a linguistic and an algorithmic perspective are considered

| Course ou | tcomes: |
|------------|---|
| a.Knowled | lge and Understanding: : |
| 1 - | Identify the fundamental concepts and theories related to NLP techniques |
| 2 - | .Explain the principles and techniques to identify the criteria for current use and future development of different machine learning techniques used in NLP |
| 3 - | Describe different qualitative and quantitative used in syntax, semantics, and other components of natural language processing |
| .Intellect | ual Skills: : |
| 1 - | Analyze different natural language problems and setting goals and requirements |
| 2 - | Propose a set of alternative solutions for a given NLP problem associated with their results |
| 3 - | Select appropriate methodologies and techniques for a given NLP problems solutions and setting out their limitations, restrictions and errors |
| .Professi | onal and Practical Skills: : |
| 1 - | Analyze, design, implement and test NLP systems |
| 2 - | Apply, design methodologies, programming languages, database systems and different supporting tool for NLP systems |

d.General and Transferable Skills: :

- 1 Work in a team to develop the requirement documentation
- 2 Apply communication skills in presentations and report writing using various methods and tools

ABET Course outcomes:

- 1 Identify the fundamental concepts and theories related to NLP techniques.
- 2 Demonstrate understanding of the principles and techniques to identify the criteria for current use and future development of different machine learning techniques used in NLP.
- 3 Demonstrate understanding of different qualitative and quantitative techniques used for syntax, semantics, and other components of natural language processing
- 4 Analyze different natural language problems, select appropriate methodologies and techniques for the given NLP problems solutions and setting out their limitations, restrictions and errors.
- 5 Analyze, design, implement and test NLP systems.
- 6 Work in a team.
- 7 Communicate effectively

| Course Topic And Contents : | | | | | |
|---|--------------|---------|----------------------|--|--|
| Topic | No. of hours | Lecture | Tutorial / Practical | | |
| Introduction To NLP | 4 | 2 | 2 | | |
| Finite State Automata | 4 | 2 | 2 | | |
| Regular Expressions | 4 | 2 | 2 | | |
| Words and Transducers | 4 | 2 | 2 | | |
| Formal Grammar of English and Syntactic Parsing | 4 | 2 | 2 | | |
| Semantics and Pragmatics | 4 | 2 | 2 | | |
| Computational Semantics | 4 | 2 | 2 | | |
| Computational Discourse | 4 | 2 | 2 | | |
| Mid Term Exam | 2 | | | | |
| Knowledge Discovery, Text Mining | 4 | 2 | 2 | | |
| Summarization | 4 | 2 | 2 | | |
| Query Answering | 4 | 2 | 2 | | |
| Revision | 4 | 2 | 2 | | |
| Final Exam | 2 | | | | |

Teaching And Learning Methodologies:

Interactive Lectures including Discussions

Practical Lab Sessions

Self-Study (Project / Reading Materials / Online Material / Presentations)

Case Studies

Brain Storming and Problem Solving

| Course Assessment: | | | | |
|--------------------------|-------------------|---------|-------------|--|
| Methods of assessment | Relative weight % | Week No | Assess What | |
| Assignments | 5.00 | 4 | | |
| Practical Exam | 10.00 | 10 | | |
| Presentations | 5.00 | 11 | | |
| Quizzes | 10.00 | 5 | | |
| Team Work Projects | 10.00 | 13 | | |
| Written Final Exam | 40.00 | 14 | | |
| Written Midterm Exam (s) | 20.00 | 9 | | |

Course Notes:

Course Notes are available with all the slides used in lectures in electronic form on Learning Management System (Moodle)

Recommended books:

Artificial Intelligent: A Modern Approach - (Third edition) by Stuart Russell and Peter Norvig, Publisher: Prentice Hall, latest edition.
