

Faculty of Oral & Dental Medicine

Oral Histology

Information :

Course Code : DHST 222

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Faculty of Oral & Dental Medicine

Instructor Information :

Title	Name	Office hours
Professor	Mona Fathy Abdel Maksoud Eldeeb	3
Professor	AMANY AHMED RABEE MOHAMED OSMAN	2
Professor	AMANY AHMED RABEE MOHAMED OSMAN	2
Professor	Mona Fathy Abdel Maksoud Eldeeb	3
Associate Professor	RANEEM FAROUK MOHAMED ADEEB OBEID	1
Lecturer	Nehad Mostafa Abd El Monsif Mostafa	2
Lecturer	Nehad Mostafa Abd El Monsif Mostafa	2
Assistant Lecturer	Aya Mohamed Reyad Ismaeil AbuHussein	
Assistant Lecturer	Yasmine Mohamed Hasan Elghazawy	
Assistant Lecturer	Esraa Gamal Hassan Mohamed	
Teaching Assistant	Nadine Ahmed Abdelhamid Ahmed Almallah	
Teaching Assistant	Marina Hany Shokry Lwis	
Teaching Assistant	Esraa El Sayed Abdelaziz Abdelrahman	

Area Of Study :

"To be in line with updates in oral biology.
 "To supply broad background about histology, embryology and physiology of oral and dental tissues.
 "To act as a base for understanding the clinical courses such as oral pathology, oral surgery and oral medicine.
 "To allow the development and application of appropriate professional attitude as well as communication and practical skills of the students.

Description :

1. Embryology
2. Periodontal ligament
3. Bone and alveolar process
4. Oral mucosa
5. Salivary glands
6. Maxillary sinus- Stem cells
7. Temporomandibular joint-

Course outcomes :

a. Knowledge and Understanding: :

1 -	Define the different oral and para oral structures, with reference to regenerative cells.
2 -	Describe embryology of oral and para oral tissues.
3 -	Recall the structure and functions of different oral and para oral tissues
4 -	Distinguish the different hard and soft oral tissues.

b. Intellectual Skills: :

1 -	Differentiate between the different oral and para oral tissues
2 -	Extrapolate any abnormalities that might affect the normal oral and para oral tissues
3 -	Summarize the histological age changes of oral and para oral tissues.
4 -	Corelate the clinical significance associated with certain oral and para oral structures.

c. Professional and Practical Skills: :

1 -	Draw the histological structures of oral and para oral tissues
2 -	Apply the technical steps for preparation of tooth ground and decalcified microscopic sections as well as the main histological and histochemical stains.

d. General and Transferable Skills: :

1 -	Communicate effectively with colleagues, staff members and helping personnel
2 -	Demonstrate appropriate professional attitude and behavior in different situations.

Course Topic And Contents :

Topic	No. of hours	Lecture	Tutorial / Practical
Embryology	16	8	8
Periodontal ligament	8	4	4
Bone and alveolar process	9	5	4
Oral mucosa	16	8	8
Salivary glands	15	7	8
Maxillary sinus- Stem cells	4	2	2
Temporomandibular joint-	4	2	2

Teaching And Learning Methodologies :

Lectures / Online lectures

Practical and Small group sessions: a. Each practical session's preceded by slide tutorial demonstration, description and drawing of oral tissues and class discussions. b. Demonstration for tissue identification using data show.

Students draw in their practical books under supervision of the responsible staff members and helping personnel in small subgroups

Course Assessment :

Methods of assessment	Relative weight %	Week No	Assess What
Final practical Examination	15.00		
Final term Examination	25.00		
Oral examination to assess knowledge and understanding	10.00		

Practical examination to assess practical skills & intellectual skills & general skills	25.00		
written examination to assess knowledge and understanding	25.00		

Course Notes :

- ~ All lectures are available for students from the faculty as a soft copy.
- ~ Textbooks: Mary Bath-Balogh, Margaret J. Fehrenbach, Dental Embryology Histology and anatomy 4th Edition, 2015.
- ~ Websites related to the study subject
- ~ Computer presentations used during teaching
- ~ Handouts for certain topics

Recommended books :

- Recommended Books:
1. Textbook of Oral Development & Histology; James Avery.
 2. Tencate's Oral Histology; Antonio Nanci.
