**Information :**

**Course Code :** ECO 209

**Level :** Undergraduate

**Course Hours :** 3.00- Hours

**Department :** Department of Economics

**Instructor Information :**

Title	Name	Office hours
Lecturer	Mohamed Awaad Ibrahim El sayed	1

**Area Of Study :**

This course mainly focuses on the interactions of economic sectors in the mixed economy, and the circular flow between them. It pinpoints government as well as individuals' activities. Markets, externalities and efficiency concepts are to be clarified. It deals with positive and normative economics, the provision of public and private goods, public choices, taxation policies and subsidies, highlighting the tradeoff between efficiency and equity as well as the distribution of income. Course Goals:

- Analyze the concept of Development and the classification of Countries according to their level of development.
- Understand and calculate the different measurement of the developmental process quantitatively.
- Evaluate and appraise different theories of economic growth.
- Define poverty, how it is measured and its consequences on social and economic issues.

**Description :**

This course through the utilization of case studies introduces the basics of development economics differentiating between types of endowments. It illustrates different theories of economic growth and development such as: Harrod-Domar growth model, Solow growth model and the endogenous growth models. It emphasizes on measuring inequality, poverty, and population growth. The course tackles the issues of education, child labor and the differences between developing and developed countries. Furthermore, different development policies and strategies (investment policies, international trade policies in short and long term, financial policies, development and distribution) are identified.

**Course outcomes :**

**a. Knowledge and Understanding: :**

1 -	Identify the relationship between population and development.
2 -	Highlight the concept of Human Capital and investment.
