

Faculty of Economics and Political Science

Industrial Economics

Information :

Course Code : ECO 409

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Department of Economics

Instructor Information :

Title	Name	Office hours
Lecturer	Fawzia Ahmed Abdelhamid Ibrahim	1

Area Of Study :

This course explains different types of markets and their structure (Perfect competition, oligopoly, monopolistic competition and monopoly). It focuses on price discrimination and its levels in linear and non-linear pricing models. Moreover, the course distinguishes between different oligopolistic theories such as the static games and Cournot model, Game theory model, Stackelberg model, limit pricing and entry deterrence, as well as collusions and cartels. It highlights the role of the Egyptian government in regulating the market, in addition to, the role of the Egyptian Competition Authority.

Course Goals:

- Analyze for competition purposes and competing perspectives in industrial economic.
- Analysis of various aspects of strategic interaction between firms and the determinants of industrial structure.
- Discuss the role of policy in the context of competition and industrial policies and regulation.

Description :

This course explains different types of markets and their structure (Perfect competition, oligopoly, monopolistic competition and monopoly). It focuses on price discrimination and its levels in linear and non-linear pricing models. Moreover, the course distinguishes between different oligopolistic theories such as the static games and Cournot model, Game theory model, Stackelberg model, limit pricing and entry deterrence, as well as collusions and cartels. It highlights the role of the Egyptian government in regulating the market, in addition to, the role of the Egyptian Competition Authority.

Course outcomes :

a. Knowledge and Understanding: :

1 -	Understand how theoretical tools are used to analyze real-world issues.
2 -	Apply microeconomic theories to analyze different industrial markets.
3 -	Adopts theoretic approach to explaining interdependencies in monopoly and oligopolistic market structures
