

Faculty of Oral & Dental Medicine **Oral Histology**

Information:

Course Code: HPT 221 Level Undergraduate **Course Hours:** 3.00- Hours

Department: Faculty of Oral & Dental Medicine

Instructor Information:				
Title	Name	Office hours		
Professor	AMANY AHMED RABEE MOHAMED OSMAN	6		
Professor	Mona Fathy Abdel Maksoud Eldeeb	13		
Associate Professor	RANEEM FAROUK MOHAMED ADEEB OBEID	4		
Lecturer	Nehad Mostafa Abd El Monsif Mostafa	5		
Assistant Lecturer	Ethar Sayed Mohamed Saeed			
Assistant Lecturer	Yasmine Mohamed Hasan Elghazawy	4		
Teaching Assistant	Mai Amer Abdeallah Attia Elsayed Elhanfi			
Teaching Assistant	Esraa El Sayed Abdelaziz Abdelrahman			
Teaching Assistant	Amira Ahmed Elsawy Elgendy			

Area Of Study:

Description:

tooth development (bud stage, cap stage, bell stage, appositional stage.) Enamel, dentin, cementum and pulp longitudinal and transverse section of enamel, dentin, cementum.) decalicified section of the pulp

Course outcomes:

a.Knowledge and Understanding: :

and one of the original of the		
1 -	Define the different oral and para oral structures	
2 -	Describe embryology of oral and para oral tissues.	
3 -	Identify and draw both hard and soft oral tissues	
4 -	Describe the structure and the function of different oral and para oral tissues.	
5 -	Differentiate between different hard dental and soft oral tissues	

[&]quot;ÁTo keep pace with recent advances in oral biology."

Áro provide an expanded knowledge about histology, embryology and physiology of oral and dental tissues.

Áro serve as a basis for understanding the clinical courses such as oral pathology, oral surgery and oral medicine etcõ È

Äo enable the development and application of appropriate professional attitude as well as communication and practical skills of the students.

6 -	Explain the clinical significance associated with certain oral and para oral structures.		
7 -	Describe the histological age changes of oral and para oral tissues		
b.Intellectu	ual Skills: :		
1 -	Differentiate between the different oral and para oral tissues		
2 -	Distinguish any abnormalities that might affect the normal oral and para oral tissues.		
c.Professi	onal and Practical Skills: :		
1 -	Use the light microscope properly.		
2 -	Identify the different oral tissuesusing the light microscope.		
3 -	Draw the histological structure of oral and para oral tissues.		
4 -	Understand the technical steps for preparation of tooth ground and as well as the main histologyical and histochemical stains decalcified microscopic sections		
d.General	and Transferable Skills: :		
1 -	Communicate effectively with colleagues , staff members and helping personnel.		
2 -	Demonstrate appropriate professional attitude		
3 -	Behavior in different situations		

Course Topic And Contents :			
Topic	No. of hours	Lecture	Tutorial / Practical
Tooth development	15		
Enamel	12		
Dentin	11		
Cementum	8		
Pulp	8		
Shedding	4		
Eruption	6		

Teaching And Learning Methodologies: Lectures. Practical Small group sessions Student draw in their practical books under supervision of the responsible in small subgroups staff members and helping personnel

Course Assessment :				
Methods of assessment	Relative weight %	Week No	Assess What	
1st Mid-term Examination	15.00		assess knowledge and understanding	
2nd Mid-term Examination	15.00		assess knowledge and understanding	
Final written Examination	25.00			
Oral Examination	10.00		knowledge and understanding and attitude	

Practical Examination	15.00	assess practical skills & intellectual skills & general skills
Semester Work	20.00	

Course Notes:

Áll lectures are available for students from the faculty as a soft copy.
