|                   |            |      |               |                |             |

**Department :** Faculty of Oral & Dental Medicine

## Instructor Information :

| Title               | Name                                          | Office hours |
|---------------------|-----------------------------------------------|--------------|
| Professor           | SHAHIRA GAMALALDEIN MOHAMED ALASHIRY          | 1            |
| Associate Professor | Sherif Abd El Rahman Lotfy Ahmed Amer         | 3            |
| Associate Professor | SARA AHMED GAMALELDIN ABDELFATTAH MOUSSA      |              |
| Associate Professor | SARA AHMED GAMALELDIN ABDELFATTAH MOUSSA      |              |
| Lecturer            | Fatma Fathy Mohamed Shaban                    | 1            |
| Lecturer            | Fatma Fathy Mohamed Shaban                    | 1            |
| Assistant Lecturer  | Kholoud Sobhy Ibrahim Farag ElDeeb            |              |
| Assistant Lecturer  | Nouran Abdalla Gomma Abdelmaged               |              |
| Assistant Lecturer  | Kholoud Sobhy Ibrahim Farag ElDeeb            |              |
| Assistant Lecturer  | Sara Abd El Halim Hassan Ibrahim Galala       |              |
| Assistant Lecturer  | Abdelrahman Mohamed Abdelwahab Mohamed Elarif |              |
| Assistant Lecturer  | Mariam Samir Nabeeh Bibawi                    |              |
| Assistant Lecturer  | NEVEN MOHAMED OSAMA IBRAHIM ALGAMMAL          |              |
| Assistant Lecturer  | Mai Talaat Mohamed Mohamed                    |              |
| Assistant Lecturer  | Mai Talaat Mohamed Mohamed                    |              |
| Assistant Lecturer  | Nouran Abdalla Gomma Abdelmaged               |              |
| Teaching Assistant  | Nariman Hesham Hamed Shaker                   |              |
| Teaching Assistant  | Sherin Sherif Fathi Ali Attia                 |              |
| Teaching Assistant  | Nourhan Hatem Amin Mohamed Elkady             |              |
| Teaching Assistant  | Rodina Ahmed Elsaid Mohamed Zoair             |              |
| Teaching Assistant  | Rodina Ahmed Elsaid Mohamed Zoair             |              |
| Teaching Assistant  | Ali Mohamed Ali Abdelsallam Mokhles           |              |

#### Area Of Study :

- a) To foster knowledge that governs the principle of oro-dental diseases.
- b) To provide opportunities for review and analysis of a wide range of patients chief complaints.
- c) To expand students analytical skills relative to clinical signs and symptoms and adjunctive special investigations of oro-dental diseases
- d) To apply and predict the knowledge obtained for the appropriate diagnosis of oro-dental diseases.

# Description :

History taking, clinical examination, oral mucosal lesion, oral ulcers, lymph nodes, diagnosis of hemorrhagic lesions, laboratory investigation.

# Course outcomes :

| ourse out  | <u>comes :</u>                                                                                                                                                                                               |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Knowled    | ge and Understanding: :                                                                                                                                                                                      |
| 1 -        | Define different types of oral diagnosis                                                                                                                                                                     |
| 2 -        | Recognize the different instruments, devices and methods used in the field of oral diagnosis.                                                                                                                |
| 3 -        | State scientific rules for obtaining patient history.                                                                                                                                                        |
| 4 -        | Describe different types of questions asked to the patient according to the relevant psychological and scientific background.                                                                                |
| 5 -        | Review different types of chief complaints                                                                                                                                                                   |
| 6 -        | Explain different techniques of oral examination                                                                                                                                                             |
| 7 -        | Recognize normal landmarks both extra-oral and intra-oral.                                                                                                                                                   |
| 8 -        | Describe information about the etiology, epidemiology, pathogenesis, differential diagnosis, prevention and prognosis of oral and oral-related disorders.                                                    |
| 9 -        | Recall different laboratory tests which aid the dentist in diagnosis of different oral lesions.                                                                                                              |
| 10 -       | Memorize rules of referral and consultations.                                                                                                                                                                |
| 11 -       | List general aspects of dental practice including esthetics, medico-legal considerations, management and maintenance of a safe working environment.                                                          |
| Intellectu | al Skills: :                                                                                                                                                                                                 |
| 1 -        | Demonstrate respect to all patients irrespective of their socioeconomics level and cultural beliefs.                                                                                                         |
| 2 -        | Converse with patients in an attentive manner that conveys concern, compassion and encouragement to patients or their families.                                                                              |
| 3 -        | Point out to the patient the nature of his/her condition, different treatment options and possible complications in such away that is easily understood answers patient questions and encourages discussion. |
| Professio  | nal and Practical Skills: :                                                                                                                                                                                  |
| 1 -        | Apply the brief concise case history in an informed consent.                                                                                                                                                 |
| 2 -        | Use different instruments and techniques of clinical examination and understand their limitations and hazards.                                                                                               |
| 3 -        | Analyze answers to the different types of questions asked to the patient.                                                                                                                                    |
| 4 -        | Differentiate between different types of chief complaints.                                                                                                                                                   |
| 5 -        | Relate information obtained from the patient history to its chief complaints.                                                                                                                                |
| 6 -        | Practice a comprehensive extra oral and intra oral examination including head and neck, oral hard and soft tissues and properly obtain vital signs.                                                          |
| 7 -        | Select the medical and dental history items relevant to chief compliant/s reported by the patient                                                                                                            |
| 8 -        | Distinguish between the range of normal clinic                                                                                                                                                               |
| 9 -        | Finding and abnormal deviations present.                                                                                                                                                                     |
| 10 -       | Interpret signs and symptoms and physical findings                                                                                                                                                           |
| 11 -       | in terms of their anatomic, pathologic, and functional.                                                                                                                                                      |
|            |                                                                                                                                                                                                              |

| 13 -        | To amalgamate the obtained clinical and investigational data base with the evidence-based knowledge and skill of deductive reasoning to be proficient in clinical problem solving. |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14 -        | Compose a prioritized list of tentative diagnosis, differential diagnosis and final diagnosis of each presented chief complaint/s.                                                 |
| 15 -        | Demonstrate appropriate professional attitudes and behavior in dealing with staff members and helping personnel.                                                                   |
| 16 -        | Choose the effective communication means with other health care professionals                                                                                                      |
| 17 -        | to maximize patient benefits and minimize the risk of errors.                                                                                                                      |
| 18 -        | Use an appropriate formal and informal consultation with specialists in situations that are beyond the scope of their knowledge and skills.                                        |
| 19 -        | Recognize infection control policies.                                                                                                                                              |
| d.General a | and Transferable Skills: :                                                                                                                                                         |
| 1 -         | Propose an individualized treatment plan for different chief complaints                                                                                                            |
| 2 -         | Assess treatment options to be done by the general dentist and those that need referral and consultation.                                                                          |
| 3 -         | Recommend the need of initial medical emergencies management as basic life support.                                                                                                |
| 4 -         | Appraise his/her duty to manage oral health of the patient with special needs                                                                                                      |
| 5 -         | Apply the health and safety regulations as                                                                                                                                         |
|             |                                                                                                                                                                                    |

6 - They affect dental practice and environment.
