

Faculty of Engineering & Technology

Thermodynamics and Fluid Mechanics

Information:

Course Code: MPR 243 Level: Undergraduate Course Hours: 3.00- Hours

Department : Department of Electrical Engineering

Instructor Information :				
Title	Name	Office hours		
Lecturer	Anas Mohamed Abdelrahman Ali	2		
Assistant Lecturer	Moustafa Raafat Aziz Shousha	3		

Area Of Study:

"Enrich studentsoknowledge about the theory of fluid mechanics and the comparison between fluids and other substances.

Train students also measure different fluid properties and analyze different fluid systems in laboratory.

Description:

Thermodynamics: Macroscopic approach to energy analysis, Energy transfer as work and heat, The first law of thermodynamics, Properties and states of pure substances, Control-mass and control-volume analysis, The essence of entropy and the second law of thermodynamics, Fluid Mechanics: Fluid properties, Similarity of fluid flows, Fluid statics; Pressure, Fluid dynamics; Conservation equations of mass and mechanical energies (Bernoulli equation), Energy and momentum conservation equations and applications, Flow through pipes; Laminar and turbulent flows, Pipes connected in series and parallel, branching of pipes, Measuring devices.

Course ou	tcomes:			
a.Knowledge and Understanding: :				
1 -	Illustrate between series and parallel pipe network design.			
2 -	State the difference between different fluid flow types.			
3 -	Define new terms; System, Thermodynamics, Fluid Mechanics.			
4 -	Recognize the difference between fluids and other substances.			
5 -	Relate the physics background to fluids.			
b.Intellect	b.Intellectual Skills: :			
1 -	Deduce conservation equations of mass and energy			
2 -	Analyze different system types found in nature.			
3 -	Solve different engineering problems related to Thermodynamics and Fluid Mechanics.			
c.Professional and Practical Skills: :				
1 -	Write a technical report on a project or an assignment.			

[&]quot;Enrich studentsok nowledge about the theory of thermodynamics and heat transfer systems on different thermodynamics systems.

2 -	Follow up safety requirements at experimental work and observe the appropriate steps to manage risks.		
3 -	Practice basic experiments on Thermodynamics and Fluid Mechanics.		
4 -	Calculate experimentally the performance of fluid and thermal devices.		
d.General and Transferable Skills: :			
1 -	Refer to relevant literatures		
2 -	Effectively manage tasks, time, and resources.		
3 -	Lead and motivate individuals.		
4 -	Collaborate effectively within multidisciplinary team.		

Course Topic And Contents :					
Topic	No. of hours	Lecture	Tutorial / Practical		
Introduction to fluid mechanics	4	3	1		
Properties of fluids	6	3	3		
Fluid statics	6	3	3		
Fluid kinematics	4	3	1		
Fluid dynamics	14	9	5		
Internal flow	6	3	3		
Momentum equation	5	3	2		
Introduction to thermodynamics	6	3	3		
Heat transfer methods	9	6	3		
First law of thermodynamics	9	6	3		
Second law of thermodynamics	6	3	3		

Teaching And Learning Methodologies :	
Interactive Lecturing	
Discussion	
Problem Solving	
Experiential Learning	
Cooperative Learning	
Research activity	

Course Assessment :				
Methods of assessment	Relative weight %	Week No	Assess What	
Assignments	5.00			
Final Exam	40.00			
Lab Exper.	10.00			
Mid- Exam I	15.00		to assess the skills of problem solving, understanding of related topics	
Mid- Exam II	15.00			

Oral Exam	10.00	
Quizzes	5.00	

Course Notes :		
No course notes are required		

Recommended books :	
None
