

Faculty of Oral & Dental Medicine

Orthodontics

Information:

Course Code: ORP 432 Level: Undergraduate Course Hours: 2.00- Hours

Department: Faculty of Oral & Dental Medicine

Instructor Information:			
Title	Name	Office hours	
Professor	Hala Munir Abdelmajeed El Sayed	2	
Professor	ESSAM MOHAMED NASSEF SELIM	2	
Lecturer	SAMEH MOHAMED TALAAT TAHA MOHAMED		
Assistant Lecturer	Reem Mohamed Hazem Hassan Hassan Aly El Shazly		
Assistant Lecturer	Sara Usama Saeed Imam		
Teaching Assistant	Abdelrahman Mostafa Mahmoud Eldesouky Elbosaily		
Teaching Assistant	Mohamed Mousa Mohamed Mousa Gomaa Dief		

Area Of Study:

- 1)-To educate the students about the basics features of facial growth and development and to familiarize students with progressing abnormalities in dental patients .
- 2)- To familiarize the student with the knowledge of occlusion and to be able to manage the etiological factors associated with the disordered occlusion.
- 3)- To enable the students to diagnose orthodontic problems
- 4)- To understand appropriate time of intervention in potential orthodontic cases and to reach students preventive and interceptive measures in developing malocclusions and improve problem solving skills
- 5)- To enable development and application of appropriate professional attitudes and communication .

Description:

Diagnosis, preventive and interceptive orthodontics. biology of tooth movements, therapeutic extraction. Orthodontics appliances principles, anchorage, materials used and retention. Practical appliances and wires.

Course outcomes : a.Knowledge and Understanding: :		
2 -	Describe the stages of normal development of occlusion during infancy , primary dentition , mixed dentition , and permanent dentition	
3 -	Recognize the phases of eruption and their effect on development of malocclusion	
4 -	Define the terminology of malposed teeth and different types of classification of malocclusion	

5 -	Identify the etiological factors of malocclusion and its impact on the developing occlusion
6 -	Describe extra oral and intraoral examination from an orthodontic perspective
7 -	Discuss the concept of extraction in orthodontics
8 -	Discuss the biological principles of tooth movement and describe the movement different types of tooth
9 -	Describe the basic biomechanical principles of orthodontics tooth movement
10 -	Recognize the behavior of orthodontics wires
11 -	Describe the needed measures for the prevention of malocclusion in the dentition stage
12 -	Identify the appropriate management of abnormalities affecting the occlusion in the primary and mixed dentition
13 -	Recognize the basic principles of orthodontic appliance design
14 -	Enumerate possible orthognathic surgical techniques and list the types of malocclusions that woul indicate their choice for treatment
15 -	Recognize the problem of relapse and the procedures taken to maintain the position of teeth achieved by orthodontic treatment
16 -	Recognize the sequelae of untreated malocclusion and its influence on oral health
17 -	Recognize the interrelationship between orthodontics and other dental specialties
18 -	Recognize the iatrogenic effect in orthodontics
19 -	Identify the moral and ethical responsibility involved in the provision of and community care to individual patients
Intellectu	ial Skills: :
1 -	Recognize a developing normal occlusion and be able to distinguish abnormal deviation that necessitates treatment.
2 -	Select appropriate time of intervention in potential orthodontic cases and are likely to be
3 -	Apply knowledge and understanding of etiology in the process of diagnosis, prevention and treatment in the mixed dentition stage
Professio	onal and Practical Skills: :
1 -	Record accurately patient's chief compliant
2 -	Report and document a complete focused medical and dental history for patients
3 -	Carry out extra-oral and intraoral examination of the patient including head and neck, oral hard and soft tissues
4 -	Perform and document a complete physical and mental status examination for a patient
5 -	Prescribe diagnostic aids appropriate for every individual case
6 -	Interpret acquired data in term of their diagnostic significances
7 -	Identify accurately underlying dento-skeletal abnormalities by analyzing cephalometric radiographs
8 -	Identify accurately space problems through study cast analysis
9 -	Identify problems, prioritize them and generate a treatment plan for each patient
ŭ	Destruction of all 199 and all accounts the contract of the first state of the stat
10 -	Design and effectively utilize simple removable appliances to interfere with a developing malocclusion (simple removable appliances)

13 -	Design and effectively utilize removable space regaining appliances
14 -	Design and effectively utilize appliances to correct cross bite situations in the primary and mixed dentition
d.General	and Transferable Skills: :
1 -	Communicate effectively with children , adolescents and their families
2 -	Recognize when and how to refer patients for specialist advise or treatment.
3 -	Communicate with other healthcare professionals both verbally and in globally accepted written formats .
4 -	Recognize moral and ethical responsibilities involved in the provision of care to individual patents and to community
5 -	Recognize the value and role of lifelong learning self assessment and critical thinking in maintaining competency

Course Topic And Contents :			
Topic	No. of hours	Lecture	Tutorial / Practical
Sequelate of untreated malocclusion	4		
Preventive Orthodontics	3		
Interceptive Orthodontics	3		
Orthodontic appliance design	4		
Therapeutic extraction	3		
Adjunctive orthodontics	3		
Orthodontic retention and relapse	4		
Ethics and medico legal issues	3		
Impression and Wire bending	3		

Teaching And Learning Methodologies:

Lectures

Clinical and small group sessions

Workshops

Practical demonstrations, Practice of skills, and discussions

The lectural hall on the 3rd floor of the faculty of oral and dental medicine; Once per week from 12pm to 1pm

Small Group sessions and activities . Each term, students are divided into 12 equal groups, each group being assigned to a two hour small group session once per week. Students will be divided into two groups during each session.

Workshops During the course seven workshops will be given covering different topics. Workshops will include lecturing followed by hand on training. Each topic will be given six times within a one week period

Course Assessment:			
Methods of assessment	Relative weight %	Week No	Assess What
Final Written Examination	25.00		
Mid Term Examinations	30.00		assess knowledge and understanding
Mid Term Practical Examination	20.00		assess ability of data collection , analysis and formulation of a treatment plan

Oral Examination	10.00	assess knowledge and understanding (and assessment general and professional skills)
Practical Examination	15.00	

Course Notes:

*Department books : available for students to purchase from department secretary.

"ÁOverhead projectors, slides and computer presentation used during teaching
